Subject: RE: Electrolux GMP

I did not see in the section regarding reporting that copies of the analytical results and Technical Memorandum were going to be submitted to EPA. This was probably just an oversight as Electrolux has been cooperative in the past. However, for clarity, I hereby request that copies of the analytical results be submitted to EPA within 30 days of receipt by either Golder or any other Electrolux representative. I also hereby request that the Technical Memorandum be submitted to EPA within 30 days of it being finalized.

During our last conversation you stated that Electrolux had no plans of conducting a soil removal or adding any additional monitoring wells at this time. When Don gets back in the office next week, Don and I will discuss our plans forward and then let you know.

I have not seen any guestimates of how long Electrolux thinks it will take for the soil and groundwater contamination to bio-remediate or how long Electrolux plans to monitor. I would like to know Electrolux's guestimate and monitoring committal. This information would be helpful if submitted before my meeting with Don.

Subject: Electrolux GMP

Brian:

Per your request, here is a copy of Golder Associates' Groundwater Monitoring Plan. It has been approved by Electrolux, and Golder anticipates commencing implementation next month.

Regards, Doug
